

# Computer Tips and Tricks for Youth and Children

**The following ten tips are basic ways that will help you stay safe when using the computer**

1. Follow your parents' rules for using the computer, tablet, phone, or other e-device.
2. The only people that should have your password are your parents.
3. Only talk to people you have met IRL before connecting with them online.
4. Discuss what you are installing with your parents before you install it.
5. If you aren't sure about it... Don't do it.
6. Once something is posted online, it is there for a LOOOOONNGG time.
7. Never give out personal information.
8. If you or someone you know is bullied online, tell someone you trust about it.
9. If you end up at a website that has bad things on it by accident, let mom or dad know what happened right away.
